**Response to Arguments**

Applicant's arguments, see remarks page 12-14, filed 7/07/2005, with respect to claims 1-6 and 9-34 have been fully considered and are persuasive. The non-final rejection of claims 1-6, 9-34 has been withdrawn.

Claims 7-8 remains cancelled by the applicant.

**DETAILED ACTION**

Claims 1-6 and 9-34 are pending in this application.

**Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 9-20 and 34, drawn to the process of transmitting a packet and providing a means for acknowledging the receipt of the packets, classified in class 709, subclass 203.
- II. Claims 21-33, drawn to a process of measuring the QoS parameters (Quality of Service) and a system comprising a means for connection set-up or reconnection system for attempting to reinstate or reestablish the connections, classified in class 370, subclass 395.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as measuring time elapsed for a packet to be sent to the destination and reinstating the low-bandwidth communications channel after a number of attempts to transmit the data. See MPEP § 806.05(d).

Art Unit: 2151

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper. The search required for two groups are different and thus it creates a serious administrative burden on the examiner.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
